Brake Technology

Newfren vanta mezzo secolo di storia nella produzione di freni per moto. Questo catalogo vuole racchiudere tutta l'esperienza e le informazioni raccolte. I materiali utilizzati per la produzione delle ganasce e delle pastiglie freno ovviamente si sono evoluti con l'azienda; certificando e garantendo prodotti sempre di altissima qualità e tecnologicamente all'avanguardia.

La gamma è costantemente aggiornata.

Newfren has half a century of experience in the production of motorcycle brakes. This catalogue is a comprehensive summary of the experience and information we have accumulated. As you would expect, the materials used to produce brake shoes and brake pads have developed with the Company, which helps to ensure that our products are always of the highest quality and at the forefront of technological development.

Our range is constantly updated.

Newfren posee mas de medio siglo de historia en la producción de frenos para moto. Este catálogo quiere enseñar toda la experiencia e información recopilada. Los materiales de las mordazas y las pastillas freno obviamente han evolucionado junto con la empresa, certificando y garantizando que los productos son de altísima calidad y tecnológicamente vanguardistas.

La gamma está actualizada de forma constante.

La storia | The Beginning | Los orígenes

LA STORIA

La storia di Newton S.p.A. ha origini ben più lontane rispetto alla data di fondazione. Già a fine anni '50 il Sig. Alessandro Barbero iniziò l'attività in assai più modeste condizioni facendo "risuonare" le vecchie ganasce usate che raccoglieva fra la clientela. Il materiale d'attacco veniva montato sui vecchi supporti opportunamente preparati. In breve tempo la rigenerazione non era più sufficiente a soddisfare tutte le richieste di metacarne e fu così che venne installata una delle primissime stazioni di montaggio del materiale d'attacco in Europa. Fusioni nuove, in conchiglia e in pressofusione e materiale d'attacco di tipo flessibile venivano assemblati per mezzo di un rivoluzionario "adesivo" di provenienza americana. Il Sig. Barbero fu il primo a incollare le ganasce feno senza più utilizzare i rivetti!

E poi un susseguirsi dinamico nel settore: contenitore in scatola di ogni singola serie, gamma completa di ganasce feno nuove e disponibili per tutti i modelli di moto presenti sul mercato, rettifica a calore aperta per il miglior adattamento ai tamburi, materiale d'attacco anti-acqua brevettato per risolvere i problemi di tenuta in condizione limite (acqua dentro i tamburi, etc.). Queste sono solo alcune delle innovazioni realizzate dal Sig. Alessandro Barbero e dalla Newton. L'attuale presidente, Valer Barbero (figlio del fondatore), continua le attività impostate nel passato, conjugando le tradizioni all'applicazione di nuove tecnologie. Il nuovo stabilimento di Città occupa una superficie di 10.000 mq di cui oltre 6.000 mq coperti. Nelle nuove linee di produzione, vengono prodotti ganasce feno, pastiglie freno, supporti metallici, dischi trilone e loro parti, dischi freno e impianti frenanti.

FILOSOFIA

Essere competitivi oggi significa dare al mercato ciò di cui ha bisogno in termini di produzione, ma anche rivolgere particolare attenzione al rapporto con l'utente finale. Questa filosofia d'impresa si è sposata con quanto di tradizionale vi è in Newton e cioè la capacità di ascoltare sempre le esigenze dei consumatori, la professionalità nello sviluppo di prodotti innovativi, la continua sperimentazione sui percorsi stradali e del fuoristrada estremo grazie anche alla collaborazione con prestigiosi team nelle maggiori competizioni mondiali di tutte le specialità motociclistiche.

Gli standard qualitativi si sono così alzati a livelli assoluti. I continui investimenti in territorio italiano dimostrano che la Newton intende fronteggiare i competitori provenienti dai paesi considerati a low cost per mantenere una tradizione tutta italiana. Tutto questo consente a Newton S.p.A. di essere oggi uno dei leader mondiali di motori.

THE BEGINNING

The origins of Newton SpA go back further than the formal registration of the Company. Back in the 1950's, Alessandro Barbero began a small business repairing used brake shoes sent to him by his customers. New brake linings were fitted to used shoes which were stripped and recycled. In no time at all, demand outstripped supply, and one of Europe's first factories for bonding friction material to brake shoes was set up. The new gravity die-cast and high pressure die-cast shoes were fitted with flexible brake linings using a revolutionary new adhesive from the USA. Alessandro Barbero was the first to assemble brake shoes in this way, without the use of rivets.

This was followed by a flurry of other innovations. Brake shoes were supplied in boxed sets, and then came the idea of offering a range of brake shoes to cover all the models on the market. A dual-grinding operation was introduced to ensure that the shoes would fit the drums more accurately, then anti-acqua friction material was introduced for use in difficult conditions. These are just a few of the innovations introduced by Alessandro Barbero and Newton. The company is now led by Valer Barbero, the son of the founder. He has remained faithful to the company's traditional activities, but these are being refined with the introduction of new technology. The Città factory covers 10,000 m², with more than 6,000 m² of buildings. The new production lines turn out brake shoes, pads, back plates, clutch plates and their parts, brake discs, and brake assemblies.

OUR AIM FOR THE FUTURE

To be competitive nowadays involves more than just giving the market what it wants. These days, you must also pay particular attention to your relationship with the end-user. This requirement fits easily with our traditional belief that we must be receptive to the requirements of the riders who use our products. This shows itself in our enthusiasm for developing new products, and our continuous program of testing both on the highway and off-road, for which we have enlisted the assistance of specialists taking part in competition at the highest international level. This has kept us on our toes, with a consequent steady improvement in our quality standards. Continuing investment in our Italian plant shows that Newton intends to face up to the threat from competitors operating in low-cost economies to maintain its Italian tradition. As a result of this, Newton S.p.A. is still a world leader in the motorcycle spares after-market.

LOS ORÍGENES

La historia de Newton S.p.A. tiene su origen mucho antes de la fecha de su fundación finales de los años 50 el Sr. Alessandro Barbero inicia su actividad en condiciones modestas, recogiendo las mordazas viejas para reconstruirlas. El material frenante se

monta sobre el

soporte bajo debidamente

preparado. Al poco tiempo la reconstrucción no era suficiente y así nació la primera estación de encolado de material frenante en Europa. Mordazas nuevas, frenos eran ensamblado mediante un revolucionario adhesivo de origen americano. Se Barbero fue el primero en ensamblar los frenos en sustitución de los remaches.

A continuación las novedades dentro del sector: cajas unifaces, gama completa de mordazas para todos los motores del mercado. Rectifica a alta presión para una mejor adaptabilidad del tambor; material especial antigua patentado para resolver los problemas de tenencia en condiciones límite (agua dentro del tambor). Estas son algunas de las innovaciones que ha realizado el Sr. Alessandro Barbero y Newton.

El presidente actual, Sr. Valer Barbero (hijo del fundador) continua la actividad del pasado combinando la tradición con las nuevas tecnologías. Un nuevo establecimiento en Città con una superficie de 10.000 m² de los cuales 6.000 son cubiertos. Nuevas líneas de producción de mordazas, pastillas, soportes metálicos, discos de embrague, discos de freno y kit frenante.

FILOSOFIA

Ser competitivo hoy significa dar al mercado aquello que necesita en términos de producción, pero prestando una particular atención a la relación con el cliente final. Esta filosofía de empresa en cuanto a tradicionalmente se tiene la capacidad de escuchar las exigencias del consumidor final junto la profesionalidad en el desarrollo de nuevos productos en el terreno carretera o del off-road en colaboración de los prestigiosos equipos mundiales. De esta manera los standares de calidad se alzan a niveles absolutos. Por tanto la continua inversión en el territorio Español en contra de los competidores provenientes de los países considerados de bajo costo para mantener la calidad italiana. Por eso Newton S.p.A. es consciente de ser un líder mundial en recambio.

La qualità certificata

Quality control

Calidad

NEWFREN CERTIFICA LA QUALITÀ

I prodotti Newfren soddiszano le norme di sicurezza nella piena salvaguardia dell'ambiente. Le nuove linee di produzione sono state concepite e progettate per rispettare le nuove leggi in materia di ingegneraggio, garantendo condizioni ottimali di lavoro sia per il personale addetto che per l'ambiente esterno. La Newfren S.p.A. ha pertanto ottenuto la Certificazione UNI EN ISO 9001-2000 per il sistema di gestione della qualità e l'ABE dal KBA tedesco per molti dei suoi prodotti. Confronti con queste scelte, è tuttora in fase di attuazione la certificazione ambientale ISO 14000.

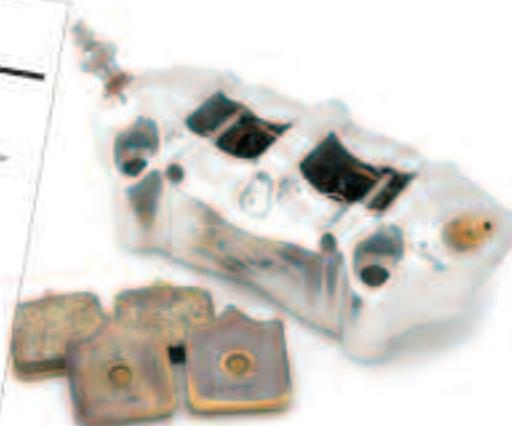

QUALITY CONTROL

The Newfren product range is manufactured in accordance with the requirements of health and safety and environmental legislation. The new production facilities satisfy all the requirements of the latest laws concerning respect for the environment, and also provide excellent working conditions for our staff. For this reason, Newfren Spa has been granted UNI EN ISO 9001-2000 certification for our quality control system, and ABE certification from the German KBA for many of its products. As part of a continuing process, we are also on the way to obtaining environmental certification ISO 14000.

CALIDAD

Los productos NEWFREN cumplen las normas de seguridad y salvaguardan el medio ambiente. Las nuevas líneas de producción han estado concebidas para garantizar las condiciones óptimas tanto para el personal de trabajo como para el medio ambiente exterior.

Newfren ha conseguido la certificación UNI EN 9001-2000 por su gestión de calidad y el ABE del KBA alemán de muchos de sus productos. Confronti con todo esto, estamos en fase de certificación ambiental ISO 14000.

Ganasce Freno

Con oltre 650 tipi di modelli, il mercato del ricambio delle ganasce è coperto interamente. Proprio per questo prodotto, Newlen S.p.A. è riconosciuta a livello mondiale come un punto di riferimento e pietra miliare del settore. Tutti i modelli vengono rettificati singolarmente e controllati prima del confezionamento.

Brake Shoes

We cover the whole of this market, with a range of more than 650 different models. For this very reason, Newlen S.p.A. is recognized throughout the world as the dominant supplier of these components. All our models are individually ground to size, and checked, before they are packaged.

Mordazas de Freno

Con más de 650 tipos de mordazas el mercado del recambio está completamente cubierto. Por esta línea de producto, Newlen está reconocido a nivel mundial como punto de referencia en el sector. Todos los modelos están rectificados uno a uno y controlados antes de su embalaje.

STANDARD

FTRANTIACQUA

Standard

Affidabilità, sicurezza e usura contenuta sono il risultato della continua sperimentazione. In accoppiata con le pastiglie freno standard Newlen, garantiscono un perfetto equilibrio di frenata.

Standard

Reliability, safety and slow rate of wear are the result of continuous development. For ideally balanced braking, use them with Newlen's standard brake pads.

Standard

Fiabilidad, seguridad y desgaste contenido es el resultado de la continua experimentación.

En combinación con las pastillas de freno estandar Newlen, garantizan un equilibrada frenada

Antiacqua

Studiate per le prestazioni fuoristrada e in condizioni critiche, hanno avviato una rivoluzione nel settore: le scanalature del materiale d'attrito favoriscono la fuoriuscita di acqua ed eventuali altri sedimenti (terra, sabbia, etc.). Inoltre queste fessiture sul ceppo consentono un maggiore e più rapido raffreddamento del materiale d'attrito. Continuano ad essere apprezzatissime dall'utenza, per la stabilità globale che garantiscono in ogni condizione di utilizzo.

Antiacqua

These shoes were designed for use off-road, and in bad weather conditions. When they were first announced, they were a revolutionary innovation. The grooves on the surface of the friction material expel water and dirt (sand, brake dust, etc.). What is more, these grooves also increase the surface area of the shoe, and improve the cooling of the friction material. They are still widely used today, and much admired for the reliable braking they provide, whatever the weather.

Anti-Aqua

Estudiadas para el uso en off road en condiciones críticas, hemos realizado una revolución en el sector, debido a las ranuras que favorecen a la salida de agua, barro, arena etc.

Ademas esta forma permite un enfriamiento del material frenante. Continuan siendo apreciados por los usuarios por la estabilidad global en cualquier condición de uso.

Pastiglie Freno

La gamma è completa e disponibile in mescole diverse, in grado di soddisfare tutte le esigenze del motociclista: per uso cittadino, per l'off-road, per i Kart, per ATV e motoslitta. In accoppiata col Dischi Freno Newfren sono risultate efficaci in ogni condizione di impiego.

Brake Pads

We offer a complete range, with a choice of materials. We have pads to suit every motorcyclist: for city use, for off-road, for karts, ATVs and snow mobiles. When used with Newfren brake discs, our pads give efficient results, whatever the conditions of use.

Pastillas de Freno

La gama es completa y disponible en diferentes mezclas, para satisfacer todas las necesidades del motorista: uso urbano, off road, para Kart, quads y motoslitta. En combinación con el disco de freno Newfren dan un resultado eficaz en cada uso.

Pastiglie BS

La qualità nelle prestazioni nasce anche dall'adattabilità e dalla durata delle pastiglie. Adeguate per tutti i modelli di ciclomotori, scooter e moto di ogni marca, si evolvono con il mercato motociclistico mondiale. Prodotte con una combinazione di materiali diversi a seconda del veicolo e del tipo d'uso.

BS pads

The overall quality of performance also depends on how long the pads last. These pads are suitable for mopeds, scooters, and motorcycles of whatever make. The range of pads has developed with the world market. They are produced in a variety of compounds, for different vehicles and applications.

Pastillas BS

La calidad de las prestaciones nace en la adaptabilidad y duración de la pastilla. Adecuada para todos los modelos de ciclomotores, scooter y motos de cualquier marca. Producto de diferentes mezclas dependiendo del vehículo o uso.

BR

ORGANICA
SPORTIVA

Pastiglie BR

La sperimentazione abbatta le barriere dei limiti. L'elevata resistenza alle alte temperature e la potenza e modularità della tenuta si traducono in una maggiore sicurezza nel turismo sportivo. Prodotte con materiali organici, sono adatte a moto di media e grossa cilindrata e raggiungono delle elevate prestazioni sui maxi scooter. Ideate anche nelle competizioni di piccole cilindrate.

BR pads

Research moves the borders forward. Improved high temperature performance with improved "bite" and enhanced "life" give a greater margin of security on the track and on the road. Made from organic materials, these pads are suitable for medium and large capacity motorcycles, and are also ideal for

super scooters. They are also suitable for small capacity race machines.

Pastillas BR

La experiencia bate los límites. La elevada resistencia a las altas temperaturas y la flexibilidad de la tenida se traduce en un mayor seguridad en el uso deportivo. Producto con materiales orgánicos, que se adaptan a motos de media y alta cilindrada, y perfectas para el manejocooler. Ideales para la competición de motos de pequeña cilindrada.

BRC

ORGANICA
RACING

Pastiglie Racing BRC

Particolamente indicate nelle specialità Superbike, Supersport e Supermoto, sono prodotte con una speciale miscela organica semi-metallica a base carbonio, in grado di sopportare un coefficiente di attrito medio pari a 0,60 m/s e stabile a tutte le temperature di utilizzo (ottimali da 100°C a 650°C). Le BRC sono dotate di uno speciale strato isolante (denominato "Thermal Underlayer") per una minore conduttività termica, che le rende adatte per ogni tipo di gara, ma anche all'uso su strada (tenendo in considerazione il loro elevato potere frenante). Si accompagnano a dischi freno in ghisa o in acciaio.

Ovviamente, per la resa ottimale, si rende necessario il rodaggio termico meccanico.

BRC racing pads

These are recommended for Superbike, Supersport, Supermoto racing. The friction material is a semi-metallic organic compound with a carbon base with a friction coefficient of 0.60 m/s at ideal working temperature is

between 100°C and 650°C. BRC pads have a special insulating thermal underlayer to reduce thermal transfer from the pad material to the back plate. This makes them suitable not only for all types of competition, but also for street use, where riders soon

faranno accettare il loro più alto livello di prestazioni. Non possono essere usati con cerchi in lega o dischi in acciaio. Per ottenere i migliori risultati, queste pastiglie necessitano di un periodo di "run-in", dopo il quale daranno il loro massimo di prestazioni termiche e meccaniche.

Pastillas Racing BRC

Especialmente indicadas para el Superbike, supersport y supermotard son un producto con un mezcla especial semimetalica en base de carbono, en grado de soportar un coeficiente de dureza de 0,60 muy estable a todas las temperaturas de uso (óptimo de 100° a 650°C).

Las BRC están dotadas de una capa aislante (llamada "Thermal Underlayer") para una menor conductividad térmica, que hace que se adapte mejor a cada carrera, también en el uso de carretera por su alto poder frenante. Uso en discos de hierro o acero.

Es necesario el rodaje térmico y mecánico para una alta frenada.

Pastiglie freno sinterizzate Brake pads - Sintered Pastillas freno in material sinterizado

70

Pastiglie S2 Offroad / Road

La speciale mescola sinterizzata, espriime nel funzionamento estremo e nelle peggiori condizioni climatiche e di termico le sue migliori qualità. Quindi, nel motocross e nell'enduro, la sinterizzata Newfren, trova la sua applicazione ideale. Per quanto riguarda le moto stradali, essa soddisfa pienamente le esigenze nei percorsi turistici e sportivi, in particolar modo, montate sui modelli che in origine utilizzano la tecnologia sinterizzata. In generale, il materiale sinterizzato Newfren, mantiene l'attacco anche a basse temperature, riducendo lo spazio di frenata contenendo maggiormente l'usura delle pastiglie rispetto ai materiali organici. Prodotti con una combinazione di materiali diversi a seconda del veicolo e del tipo d'uso. Attenzione però: tutte le pastiglie a mescola sinterizzata sono assolutamente sconsigliate in accoppiamento con i dischi freno in ghisa.

S2 Offroad / Road Pads

The sintered compound we use is most beneficial in off-road applications, particularly in bad weather and on difficult terrain. Motocross and enduro are ideal applications. When street bikes are concerned, these pads are perfect for touring and performance use; and are ideal replacements for the sintered pads fitted as

on many touring and race-replica models. Newfren sinterized material retains its "bite" at low temperatures, reduces braking distance, and has a lower rate of wear than organic materials. The compound chosen varies according to the vehicle type and the use for which it is intended. A note of caution: we do not recommend the use of sintered pads with cast iron brake discs;

Pastilla S2 Offroad/Carretera

La especial mezcla sinterizada, expresa en el off-road extremo y en las peores condiciones climáticas y de terreno, sus mejores cualidades. Por tanto las sinterizadas Newfren en cross y enduro tienen su uso ideal. En las motos de carretera están indicado para un uso turístico y deportivo para todos aquellos que en origen usa la tecnología sinterizada. En general el material sinterizado de Newfren se mantiene el agarre incluso a bajas temperaturas, disminuyendo la distancia de frenada conteniendo el desgaste con respecto al material orgánico. Las pastillas combinan diferentes materiales según la moto y el uso. ATENCIÓN todas las pastillas sinterizadas se recomienda el uso de discos de freno en acero.

S2 SINTERIZZATA OFF-ROAD/ROAD

Pastiglie Racing S3

Mescola sinterizzata di tipo racing, studiata e utilizzata dai piloti nelle specialità Superbike, Supersport e Motard. Resiste alle alte temperature nel più aspro delle campionati. Utilizzabile anche dall'autunno con professionisti che richiede il massimo delle prestazioni. Da utilizzarsi esclusivamente accoppiato con dischi freno in acciaio.

S3 Racing Pads

This is a sintered racing compound, designed for and used by riders taking part in Superbike, Supersport and Supermoto events. It stands up well to the high temperatures encountered in competition use. Suitable also for track-day fans looking for maximum performance. To be used only and exclusively with steel discs.

Pastillas Racing S3

Mezcla sinterizada de tipo racing, estudiada y utilizada por pilotos de Superbike, supersprint y supermotard. Resiste las altas temperaturas en el uso extremo de la competición. Utilizable por el usuario no profesional que quiere el máximo de las prestaciones debe utilizar solamente con disco en acero.

newfren.it

Catalogo prezzo on line, newfren.com per argomenti.

E' con il suo nuovo Newfren online catalog di vendita online che Newfren ha deciso di aprire una nuova strada per i suoi consumatori. Un catalogo online che permette di avere tutti i prodotti disponibili su Newfren.com in pochi click, riducendo così molto il tempo di percorso e la spesa di spostamento per visitare i negozi di auto vicini o distanti. A questo servizio si aggiunge l'opzione di ricevere via e-mail le informazioni sui prodotti desiderati.
